6. Large no. of colors available in different sizes
7. Light in weight and easy to install can save a lot of time and manpower cost.
8. easy to be cut,drilled,nailed,sawed

WHAT IS PVC?

Polyvinyl chloride (commonly abbreviated as PVC) is a widely-used plastic. Globally, over 50% of all PVC manufactured is used in construction. As a building material, PVC is budget-friendly and easy to assemble. In recent years, PVC has been replacing traditional building materials such as wood, concrete and clay in many areas.

WHAT IS PVC WALL PANELLING?

PVC cladding was developed in Germany in the 1970s as a decorative interior wall finish with unique properties compared to other wall coverings at the time. PVC cladding or paneling is a hollow cored, lightweight panel with a smooth surface for decoration and a tongue-and-groove edge for easy assembly.

WHAT IS THE ADVANTAGE OF PVC WALL PANELLING OVER WOOD PANELING? OVER TILEBOARD?

PVC paneling is highly resistant to moisture and water. When compared to wood, WALL AFFAIRS PVC panels will not warp, delaminate or swell. PVC paneling is superior to wood paneling or tile board because of the lower cost.

ADVANTAGES:-

Easy and fast to install: PVC wall cladding is a very user-friendly product, to begin with. One can easily cut the panels to size and install them, making it the ideal DIY solution: fast and easy. Compared to tiles, they take about half the time to fit (no grout!). Since they are so easy to install, any DIYer can fit them, saving money on a fitter.

Water resistant: PVC panels are very popular in the bathroom and kitchen areas as they are water-repellent and mould resistant, but they can be used all over the house (basements, attics, garages and also bed and living rooms).

Budget-friendly: When compared to tiling, you save a lot of money on time and work when you are installing PVC panels to the wall. Most of the time, PVC wall panels are also price-wise more interesting if you look at the price per square meter.

All-round and all-area product: Our panels are the ideal covering for walls and ceilings of private houses, offices, hotels, laboratories, hospitals, food processing plants, etc. The possibilities are endless: from the use as a decorative wall panel to a shower wall panel.

Hygienic: WALL AFFAIRS panels provide a very clean and hygienic solution for wall and ceiling decoration. Once installed, there is no grout to go dirty. PVC is mould-repellent and not a suitable material for bacterial growth.

Low maintenance: PVC panels require only a low maintenance, and when you want to clean them, it does not take you long. Due to the smooth surface of the panels, dirt does not gather in pores or cracks. A simple cloth will do to clean the surface. Do not use chlorinated or abrasive agents.

Recyclable: PVC is 100% recyclable. Our panels can be taken to any plastic recycling centre.

No further finishing or care required after installation: no paint, no lacc, no varnish...

EASY SIZE

Easy to transport
Leicht zu transportieren
Gemakkelijk transport
Facile a transporter

PVC wall and ceiling panels are usually available in different lengths like 8',9',10' and so on and are therefore easy to transport, without risk of transport damage..

EASY FIX

Easy to install
Leicht zu montieren
Gemakkelijk te plaatsen
Facile a installer

The user-friendly WALL AFFAIRS panels installation takes place very simply and quickly. Thanks to the practical short lengths, you can also install WALL AFFAIRS CEILING AND WALL PANEL Scompletely on your own. In this way, you save time and money and you will be able to enjoy your new wall or ceiling a lot more quickly.

NO WASTE

Eco and budget friendly
Umwelt-und
haushaltsfreundlich
Milieu-en budgetvriendelijk
Ecologique et economique

When during installation you come to the end of an assembled row of panels, you simply saw the last panel to length as required. With this sawn-off piece, you can simply begin the new row, and in this way build on and complete the wall or ceiling. Cutting waste is reduced to a min-imum and in addition you also save a pretty penny.

RESISTANT

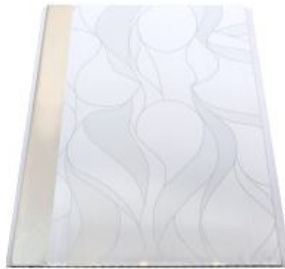

Waterproof and colourfast
Wasserdicht und farbecht
Waterbestendig
en kleurvast
Etanche et UV-resistants

WALL AFFAIRS panels are made out of a PVC that is fully waterproof and fully washable. Maintenance is therefore very simple. All you need to do is clean with a damp cloth and your wall or panel is as good as new. Naturally WALL AFFAIRS keeps its original colours, even with intensive maintenance.
